The Next Gen Crypto Wallet

Token Whitepaper

Issuer of Best Wallet Token: Best Wallet EOOD, 1 Pop Bogomil str, Oborishte District, Office 9, Sofia – 1202, Bulgaria (BG)

This crypto-asset whitepaper has not been approved by any competent authority in any Member State of the European Union. The offeror of the crypto-asset is solely responsible for the content of this crypto-asset whitepaper. This whitepaper was released on 23/12/24.

Website: www.bestwallet.com

Presale: www.bestwallettoken.com

Abstract

Best Wallet, powered by the \$BEST token, aims to capture 40% of the crypto wallet market share by the end of 2026. This secure, multi-chain, multi-wallet, non-custodial platform is poised to dominate the industry. As the first fully integrated Fireblocks MPC-CMP wallet, Best Wallet offers custom multi-wallet portfolios and simplified presale purchase flow with its hugely exciting Upcoming Tokens portal.

The BEST Ecosystem comprises Best Wallet, Best DEX, and Best Card – a comprehensive, all-encompassing range of products to service all the needs of any crypto user.

Problem:

Current popular and established crypto wallets are controlled by centralised companies and have potential points of failure, while decentralised wallets do not serve all of the modern crypto users' needs and are not mobile-friendly.

Solution:

Best Wallet aims to be the easiest and safest crypto wallet to use for investors of any level – with the most features, capabilities, and added benefits such as early token opportunities. We aim to revolutionise the Web3 experience and offer competitive benefits for holders.

This whitepaper outlines the project's vision, roadmap, tokenomics, and technical foundations.

Best Wallet EOOD and their directors confirm that, to the best of the knowledge of the management body, the information presented in the crypto-asset whitepaper is fair, clear and not misleading and the crypto-asset whitepaper makes no omission likely to affect its import. The prospective holder should base any decision to purchase Best Wallet Token on the content of the crypto-asset whitepaper as a whole and not on the summary alone. The offer to the public of Best Wallet Token does not constitute an offer or solicitation to purchase financial instruments and that any such offer or solicitation can be made only by means of a prospectus or other offer documents pursuant to the applicable national law. This crypto-asset whitepaper does not constitute a prospectus as referred to in Regulation (EU) 2017/1129 of the European Parliament and of the Council or any other offer document pursuant to Union or national law.

1. Information on the Project

The Challenge

MetaMask, Binance, Coinbase, Exodus, and Ledger are arguably the most recognised wallet brands in crypto. However, the most-used wallet, MetaMask, is controlled by centralised companies while Binance and Coinbase are centralised exchanges. These present potential points of failure. Exodus and Ledger are decentralised wallets but simply not mobile-friendly.

Wallets are just dApps that are used to interact with the blockchain, yet none of the established players provide any visible extra benefits for users other than serving their basic functions. In addition to this, established wallet brands are resting on their laurels and see no reasons to innovate or make things easier for the end user.

The Solution

Best Wallet aims to be the easiest and safest crypto wallet to use for investors of any level – with the most features, capabilities, and added benefits. With a mission to capture 40% of the crypto wallet market share by the end of 2026, Best Wallet revolutionises the Web3 experience offering competitive benefits for holders.

Powering the Best Wallet ecosystem, the \$BEST token enables reduced transaction fees, exclusive early access to the hottest new presales, and gamifies wallet engagement through the \$BEST airdrop, positioning \$BEST to become the leading wallet token in the decentralised market.

Best Wallet offers significant added value for users with its bespoke Upcoming Tokens portal, which provides a gateway to invest in new crypto projects that are still in the presale stage. Presales present a huge opportunity for people to get into new tokens at the lowest prices before they are listed on exchanges and exposed to the general market. This alone gives Best Wallet a huge value proposition.

Best Wallet Ecosystem

Three products, all integrated within the Best Wallet app.

Best Wallet

Best Wallet is an easy-to-use, fully non-custodial, no-KYC crypto wallet that supports thousands of major cryptocurrencies across over 50 major chains, including Bitcoin, Ethereum, and USDT. You can buy, swap, hold, and sell your crypto all within the Best Wallet app.

Best DEX

Best DEX is a DEX aggregator integrated within the Best Wallet app. Powered by Rubic, it always finds the best rates for users' swaps. It supports 50+ chains, connects to over 200 decentralised exchanges, and uses up to 20 cross-chain bridges. Users can make both same-chain and cross-chain swaps.

Best Card

In development, Best Card is a crypto debit card allowing users to spend BTC, ETH and other major crypto tokens anywhere a card is accepted (e-commerce, in-store, ATM). Earn up to 8% cashback on all purchases.

Key Best Wallet Features

A Mobile First Experience: Everybody has a mobile phone, so to make crypto truly mainstream it has to be as accessible as any other app. This is where Best Wallet's mobile-native UX and intuitive design trumps any other wallet on the market.

First Wallet on Fireblocks: As the first crypto wallet to use Fireblocks MPC-CMP wallet technology, Best Wallet offers custom multi-wallet portfolios and simplified presale purchase flow with its Upcoming Tokens portal.

Secure Access to Presales: Best Wallet deploys best-in-class wallet tech to facilitate decentralised transactions on any dApp, and offers direct access to vetted presales in Upcoming Tokens. This removes third-party risk, allowing you to invest early with confidence and peace of mind.

Seamless Cross-Chain Swaps: Best Wallet's multi-chain, multi-wallet user experience – where all your crypto is managed in one app – is bolstered by our partnership with Rubic, enabling easy interoperability between chains to make your crypto life far less complicated.

iGaming Partnership Opportunities: Best Wallet is the only self-custody crypto wallet that has proven iGaming partnerships, giving \$BEST holders industry-leading benefits such as free spins, exclusive lootbox access, top-tier deposit bonuses, free plays, and reduced withdrawal fees.

Roadmap & Milestones

Best Wallet and the extended BEST ecosystem have been in continuous development for more than 18 months, with many roadmap items already ticked off, and many more still to come. Our developers are constantly improving and updating the Best Wallet app to ensure the highest technical standards and best user experience worthy of the best crypto wallet.

Phase 1

- Market Research
- Passcode, Login, 2FA
- Biometric Security
- Core Wallet Functionality
- Fiat Onramp
- Multi Wallet Support
- Best DEX – Launch

Phase 2

- New Token Launchpad
- dApps iGaming Hub
- Airdrop Launch
- Fiat Offramp
- Cross-chain swaps
- Support 60+ Chains
- Advanced Anti-Fraud Protection

Phase 3

- Address Book
- Best Card Launch
- Portfolio Management Feature
- Browser Extension
- NFT Gallery
- Rewards Hub
- In-App Crypto News Feed
- Derivatives Trading
- Staking Aggregator

Phase 4

- Market Intel Analytics
- Limit Orders
- Stop-loss Orders
- Dollar Cost Average buy/sells
- MEV Protection
- Gas token-free transactions

Technical information

Best Wallet Token is built on the Ethereum blockchain, which has a robust and secure Proof-of-Stake (PoS) consensus mechanism. Ethereum enables smart contract capabilities for \$BEST, which is an ERC-20 token.

One application for \$BEST is the creation of a staking pool contract allowing users to lock their tokens in a smart contract in order to receive dynamic APY rewards in \$BEST. An allocation of the total \$BEST supply is set aside for the purpose of paying out daily rewards.

All transactions on Ethereum require gas fees, determined in gwei and paid in ETH, and fluctuate depending on the volume of transactions on the network.

The \$BEST smart contract is audited by Coinsult: <https://coinsult.net/projects/best-wallet>

For utility tokens describe the product that the token will give access to

Holding \$BEST tokens represents a golden opportunity to be a part of something huge as Best Wallet aims to capture significant market share from the currently more established brands. As Best Wallet becomes a major industry player and the BEST ecosystem grows, so should the rewards and benefits for \$BEST holders and supporters.

The \$BEST token offers a range of additional utility for Best Wallet users:

Early Access to New Presales: Through Best Wallet's presale aggregator, access and buy into the most trusted and profitable presales and airdrops.

Reduced Transaction Fees: Benefit from reduced transaction fees across the Best Wallet ecosystem when you hold the \$BEST token.

Higher Staking Rewards: Hold the \$BEST token to gain higher APY staking opportunities in our Best Wallet staking aggregator.

Community Governance: Hold \$BEST to take part in decisions about adding new blockchain support, tokens and product features. The community's voice is always heard.

Staking \$BEST

Running in tandem with the Best Wallet presale is a powerful staking mechanism that rewards early \$BEST token adopters and incentivises long-term holding. Early buyers of \$BEST will have the exclusive opportunity to stake their tokens immediately during the presale phase, unlocking dynamic Annual Percentage Yield (APY) rewards.

By staking \$BEST tokens during the presale, you gain early access to dynamic rewards and benefit from the highest APYs, rewarding long-term loyalty and engagement with the Best Wallet community.

How Staking Works:

- **Dynamic Rewards:** The rewards for \$BEST stakers are dynamic, meaning it fluctuates based on the total number of stakers and each individual's contribution to the staking pool. The earlier you stake and the larger your share of the pool, the greater your rewards.
- **Rewards Pool:** A total of 8% of the \$BEST token supply is allocated for staking rewards. This ensures long-term benefits for stakers while promoting healthy tokenomics and sustainable growth for the project.
- **Proportional Rewards:** Staking rewards are distributed proportionally based on each holder's percentage of the total staked pool. The more you stake relative to other participants, the higher your reward.

Environmental impact of using the blockchain

Best Wallet and the \$BEST token operate on the Ethereum blockchain, a Proof-of-Stake (PoS) network, meaning the environmental impact of any and all transactions are negligible.

Team

The core team and advisors have voted to remain anonymous but are known to and vetted by the director, Mihail Rachev Nedelchev.

Development will be carried out by Best Wallet Token internal developers, leveraging crypto and blockchain technology, with smart contracts built and implemented by Web3Payments.

2. Token Economics

The \$BEST token will initially be offered in an exclusive early presale for Best Wallet users, who will be able to purchase tokens at the lowest prices directly in the Best Wallet app, from the Upcoming Tokens portal, for two weeks before the sale opens to other wallet providers.

Funds raised will be used for expanded product development and strategic marketing campaigns, with token allocations set aside for the \$BEST Airdrop, staking rewards, community rewards, exchange liquidity, and a treasury reserve.

Total Token Supply:

10,000,000,000 \$BEST

There was no seed or private sale, except for a two-week period when the \$BEST token was available for the public to purchase exclusively through the Best Wallet app. The \$BEST token starts in a public presale at a price of \$0.0225 per token and rises incrementally with each stage, for a total of 100 stages, or until sold out. The final stage is scheduled to end on 30 May 2025, but the presale may conclude early based on demand.

Tokens can be purchased using Ethereum (ETH), BNB Coin (BNB), Tether (USDT) or bank card. Payment facilities are available on the Best Wallet Token website, powered by Web3Payments. Token claiming will be available on the Best Wallet Token website from the same payment widget used to purchase tokens, using the same wallet.

Token Distribution

Product Development	2,500,000,000
Marketing	3,500,000,000
Airdrops	1,000,000,000
Staking Rewards	800,000,000
Exchange Liquidity	1,000,000,000
Community Rewards	700,000,000
Treasury	500,000,000

Listing

\$BEST token will be listed on an Ethereum-based decentralized exchange (DEX) such as Uniswap shortly after the end of the presale, at an issue price in line with the final presale stage price of \$0.024975.

Centralized exchange (CEX) listings are also planned for the \$BEST token, subject to negotiations with exchange partners. This whitepaper will be updated once confirmed CEX details become available.

4. Risk Disclaimers

It is important that investors understand the following risk:

- In the future, *Best Wallet Token* may lose its value in part or in full;
- *Best Wallet Token* may not always be transferable;
- *Best Wallet Token* the crypto-asset may become illiquid;
- *Best Wallet Token* may not be exchangeable against the good or service promised in the crypto-asset whitepaper, especially in the case of a failure or discontinuation of the crypto-asset project;
- *Best Wallet Token* is not covered by the investor compensation schemes under Directive 97/9/EC of the European Parliament and of the Council;
- *Best Wallet Token* is not covered by the deposit guarantee schemes under Directive 2014/49/EU.

Best Wallet FOOD and their directors confirm that the crypto-asset whitepaper complies with this Title and that, to the best of the knowledge of the management body, the information presented in the crypto-asset whitepaper is fair, clear and not misleading and the crypto-asset whitepaper makes no omission likely to affect its import.

The prospective holder should base any decision to purchase *Best Wallet Token* on the content of the crypto-asset whitepaper as a whole and not on the summary alone.

Retail holders have a period of 14 calendar days within which to withdraw from their agreement to purchase crypto-assets without incurring any fees or costs other than blockchain transaction fees and without being required to give reasons. The period of withdrawal shall begin from the date of the agreement of the retail holder to purchase those crypto-assets. Due to the volatility after launch, refunds can only be granted during the presale period.

The offer to the public of *Best Wallet Token* does not constitute an offer or solicitation to purchase financial instruments and that any such offer or solicitation can be made only by means of a prospectus or other offer documents pursuant to the applicable national law.

This crypto-asset whitepaper does not constitute a prospectus as referred to in Regulation (EU) 2017/1129 of the European Parliament and of the Council or any other offer document pursuant to Union or national law.
